Business Spotlight

This month, we are spotlighting Dr. Maryann Jacks of People's Healthcare, LLC

People's Healthcare, LLC is a primary care medical practice designed to bring on-site medical care, innovative healthcare programs, and practical healthcare solutions directly to people's homes, businesses, schools, and communities.

We're focused on creating healthcare opportunities that are woven into people's "everyday lives in everyday places", so that good health and healthcare become a way of life.

In addition to physician home visits, we offer a number of innovative physician healthcare programs such as our "Invest In Your Health Program" (designed to help small businesses bring on-site medical care to their employees and help reduce the cost of health insurance), our "Doctor By Your Side Program" (for times of special healthcare needs and advocacy), and our Transitional Medical Care Program (for more intensive physician home care upon hospital discharge).

A primary goal of our practice is to network with other community resources to help provide healthcare for those in need, and we've started a Community Healthcare Sponsorship program to help support and fund this care. We're striving to eliminate the many barriers and frustrations that people face with healthcare, partner with them in their care, and empower them to better care for themselves.

You can contact us for further information by calling People's Healthcare, LLC at **(732) 391-5269**
